

DHL GLOBAL SAME DAY SMART SENTRY

DHL GLOBAL SAME DAY LAUNCHES SMART SENTRY – A REAL-TIME TRACKING DEVICE THAT MONITORS CONDITIONS AND PROVIDES A COMPLETE VISIBILITY SOLUTION FROM DEPARTURE TO DELIVERY.

WHAT IS SMART SENTRY AND HOW DOES IT WORK?

SMART SENTRY is a compact locator device that gets attached to high-value cargo – be it on the ground or in the air. Once in transit, the device transmits real-time tracking data via global cellular networks to a 24/7 central monitoring location staffed by a DHL Global Same Day team. In addition, clients can track shipments via an easy-to-use Web portal.

SMART SENTRY monitors the following shipping conditions in real-time:

- Location
- Ambient Temperature
- Pressure
- Motion
- Vibration
- Speed
- Shock
- Light

Should a shipment become compromised in any way, an alert is immediately sent out, and DHL Global Same Day is able to deploy rapid response services and proactively intervene.

SMART SENTRY + DHL GLOBAL SAME DAY = A MORE INTELLIGENT WAY TO SHIP.

DHL GLOBAL SAME DAY CAN SURROUND A SHIPMENT WITH THE TECHNOLOGY AND SERVICES REQUIRED TO GET IT THERE ON OR BEFORE A SCHEDULED TIME, IN THE DESIRED CONDITION.

WHO BENEFITS FROM THIS TECHNOLOGY?

- Clients who want to have more control over their supply chain.
- Clients sensitive to their reputation and the high cost of delays.
- Anyone needing to improve operational efficiencies.

SMART SENTRY technology is particularly attractive to clients that ship high value, sensitive cargo including electronics, media, and energy equipment. Plus, any shipments that require condition monitoring such as cold chain pharmaceuticals, clinical trial logistics, blood products, and environmentally sensitive medicines.

SMART SENTRY CAN:

- Keep shipments safe and consequently save on insurance with reduced premiums.
- Take action should a shipment get stuck in traffic or get compromised in any way.
- Deploy local law enforcement and help prevent potential loss due to theft.
- Maintain package integrity and ensure an on-time arrival of critical shipments.

SMART SENTRY monitors real-time conditions and uses alerts to intervene if necessary and ensure an on-time delivery.

DHL GLOBAL SAME DAY provides immediate pickup with expedited door-to-door delivery 24 hours a day, 365 days a year. Ideal for emergency shipments.
